ONDŘEJ LANGR
FULLSTACK DEVELOPER
Czech Republic

About

Hi! My name is Ondřej Langr. I'm a fullstack developer and I specialize in making web a better place.
I started as everybody else - with strong passion for programming and creation. In the end I ended up doing web development and I absolutely love it.
My daily bread has been Javascript (Typescript slang), React, NextJS, Express, PHP, SQL, Postgres for about +5 years that I've been programming for my clients.
I'm very open to new opportunities, happy to learn something new and meet deadlines!
I could write on and on about what I can do - but I would rather listen to your problems and build something awesome together. So wait no more and let's talk some business!

Experience

Freelance (Fullstack developer)
2016 - Present (5 years and 5 months)
I've been having a blast with new and efficient technologies. Freelancing has been my go to formula since I get to learn new technologies as fast as possible without any husstle. It's grind time!

Dvořák Systems s.r.o (Fullstack developer)
2019 - 2020 (1 years and 10 months)

Provided UX consulting and full-fledged solutions from ground to top. Mainly JAM stack.

Relevant Education

Střední škola informatiky a služeb (High School of IT)
2016 - 2020 (4 years)
Graduated from Czech, English B2 level and application programming in Java/C#.
